

SIMCenter Silicon Valley

Visualizing sustainable solutions to global and local problems so we make informed choices quicker

The *SIMCenter* is an immersive visualization facility that fosters global understanding and collaborative problem-solving.

Participants can literally "see" past trends, future projections and compare choices for the future.

The large digital floor displays layered mapping (GIS) that accelerates understanding of global and local trends.

"How do we make the world work for 100% of humanity in the shortest possible time through spontaneous cooperation without ecological damage or the disadvantage to anyone"
World Game™ mission

Where do we go to grapple with the most challenging issues of our time?

Why Silicon Valley?

- Silicon Valley is the technology capital of the world -- connected globally with companies committed to making the world a better place
- Stanford University – home of the Buckminster Fuller archive and leadership in global solutions
- NASA AMES – providing global situation analysis and imagery of our world
- City of Palo Alto – leading sustainable City and Director
- Silicon Valley leadership in Sustainability can have a Global Impact

What's Needed? \$10M+ Funding & Sponsorship
